

# Aqua flush

SASA PRIVATE LIMITED

## CORROSION RESISTANT WATER BASED CLEANING AGENT

### Product Description

Aquaflush is an advanced water based cleaning agent based on organic compounds which effectively dissolve oils and loosen dirt and grit particles. Any iron particles & chips are also removed due to the dissolution action of oils binding these particles onto the component. The product is totally free from any irritating chemicals that are usually present in generic cleaners. The product also prevents corrosion on the components usually caused due to water in the washing media. Following are the important features:

- Corrosion resistant
- Non-irritating to skin
- Non Foaming
- Biologically Friendly
- Heating not required
- Dissolves grease, oils & dirt
- For Fe, Al, Cu, Brass and all plated parts
- Does not react with rubber
- Does not form any deposits
- Non-flammable
- Consists of bio-degradable agent
- Safe for use in contact with skin

**NON  
FOAMING**

Method: Dissolve in DM or tap water @ 3-5% concentration

Equipment: Manual Dipping, Ultrasonic Cleaning Machine, Spray Jet Cleaners

pH: 8-9

Concentration: 3%-5% (3% for machined components & upto 5 % for castings)
